BETA 1055D

Adjustable self-locking pliers, for nuts and cylindrical profiles

Self-locking pliers guarantee safety for the most diverse machining operations.

The characteristic shape of the jaws allows firm gripping of both classic sheet metal and rusted cylindrical profiles and nuts.

Features

Self-locking pliers for multiple uses

VERSATILITY

Adjustable self-locking pliers specially designed to facilitate all welding-related operations: tightening, cutting cables and wires, and unscrewing rusted and damaged bolts.

CONCAVE JAWS

The characteristic shape of the jaws makes it possible to clamp even U-shaped profiles, on which it is usually not possible to work comfortably and with the desired results with other self-locking pliers.
