# THE NEW WORKSHOP EQUIPMENT RANGE

# Beta

RS050

Based on the expertise acquired with the two existing workshop equipment ranges, RSC55 and C45PRO, which allowed us to listen to and fully understand professional users' requirements, the project for the new range, RSC50, relies on the following pivotal concepts:

## QUALITY

Our acclaimed care in choosing the materials, painstaking attention for detail and, last but not least, the captivating design make the RSC50 a one-of-a-kind workshop equipment range.

## FLEXIBILITY

Each workshop equipment combination can be extended or modified at any time as required.

## COMPATIBILITY

The drawers in Beta's standard dimensions (588x367 mm) can accommodate the numerous tool modules, which are available in both soft and hard versions, made from EVA and ABS respectively.

## EFFICIENCY

Simple, quick installation, based on the optimized production of the various parts of the range.

## FUNCTIONALITY AND STURDINESS

The 63-cm-deep worktop means having a large, convenient, functional work surface available. It can be fitted with a vice, thereby allowing heavy-duty jobs to be carried out.

The new workshop equipment range, RSC50, comprises preassembled combinations, developed by Beta for professionals; alternatively, you can design your workplace on your own, choosing from many under-bench modules, wall-mounted cabinets and furnishing accessories. The customized colours of the drawer handles and lights under the worktops and wall-mounted cabinets result in unique workshop equipment, thus making the RSC50 an ideal choice for those who prioritize working in a functional, efficient environment.
