\*Werkzeug entwickelt in den Niederlanden (DIN EN 10001) mit einem verschleißfesten  
 und geschärftem Stahl in der Ausführung des Feinschnitts mit Hartmetall.  
 \*L'utensile può essere utilizzato in sicurezza per lavorare con materiali duri.  
 \*Beta professional tools cannot be used in contact with explosive or with devices that function  
 in explosive atmosphere.  
 \*Aluminum can react with the copper of the tool surface under certain conditions,  
 and may generate explosion.
