

BETA 1462/KEP Pneumatic diesel injector puller

Certifications and Standards

Quick and Effortless Removal

Designed to remove injectors very quickly and effortlessly, our extractor significantly reduces the time and energy required for the maintenance process

Ease of Connection

Thanks to the included fittings, the pneumatic jack can be easily connected to the threaded seat of the injector. This ensures quick and easy installation, reducing the risk of errors and ensuring a more efficient operation

Operational Safety

The remote control allows you to work in complete safety, keeping the operator at a distance while the jack exerts its hammering force. This minimises the risk of injury during use

Efficiency on Locked Injectors

With a powerful beating force, the extractor guarantees the removal of even the most stubborn injectors blocked by carbon residues. This ensures that even the most difficult cases can be solved without damage to components
