

1462/KU

Universal tool assortment for removing diesel common rail injectors

Complete with pliers and hammer

390x290x100 mm - 4,5 kg

This kit allows injector removal with two distinct procedures:

- using pliers with holding arms perfectly fitting to shape of injector;
- using articulated joint adapter and pivot, which must be screwed to fitting of common rail duct.

This operation can be carried out without disassembling injector head.

Injectors: Bosch, Denso, Siemens

Bosch, Denso and Siemens injectors
