BETA 1740AN

Heavy-duty riveting pliers, supplied with 5 interchangeable nozzles

Manual riveting pliers for heavy industrial applications: the high length of the arms reduces the application of force during use.

Suitable for use with rivets of different materials, from aluminium to steel, from light alloys to stainless steel, with interchangeable nozzles from 3.2 mm to 6.4 mm mounted on the arms and ready to use.

Features

Heavy duty riveting pliers supplied with 5 interchangeable nozzles.

MULTIPLICITY OF USE

The presence of interchangeable nozzles makes it possible to select the most suitable one for the required application.

PRACTICALITY

Powerful, but not uncomfortable: despite its size, this riveting pliers is practical and easy to use.
