

BETA 1972/20V-13BMC Impact drill, 20V, BRUSHLESS (machine body)

Certifications and Standards

Features

Versatile drill/driver thanks to its 3 modes of use: drilling, screwdriving and hammer drilling.

HIGH PERFORMANCE

Thanks to the brushless (brushless) motor and high quality internal mechanisms, this drill/driver guarantees a considerable increase in performance and longer tool life.

VERSATILITY

The drill/driver is a versatile tool, ideal for multiple applications:

Drilling: perfect for working on wood, metal and masonry.

Screwdriving: allows you to tighten and loosen screws and bolts with ease.

RELIABILITY

20 torque settings for precise screwing in different materials, preventing damage from over-tightening.

BRUSHLESS MOTOR

Brushless motor offers more power, lower energy consumption, extended motor life, better power dosage from the button.

COMPACTNESS

Compact and handy: with a length of only 210 mm, it is perfect for working even in tight, hard-to-reach spaces.

REVERSIBILITY

3 modes of use: drilling, screwdriving and hammer drilling.
