

BETA 416G/SP25 SET OF 25 HSS DRILLS WITH STEP TIP GEOMETRY

Features

Designed for professionals, Beta 416G/SP25 drills guarantee precise and fast drilling in a wide range of materials.

FAST AND EFFORTLESS PENETRATION

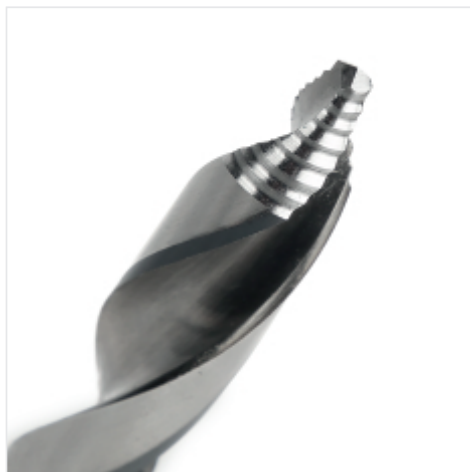

The special step drill geometry (from \varnothing 3.0 mm) optimises drilling speed, increasing the speed of the operation by up to 50% compared to conventional drills.

VERSATILITY OF APPLICATION

Suitable for alloy and high-alloy steels, iron, aluminium, non-ferrous metals, plastics and wood.

SUPERIOR TOOL LIFE

The superior quality of HSS steel gives the drill bit a long service life.

INCREASED STABILITY

The reduced first step at the top of the drill bit reduces the risk of deflection when starting to drill, even on curved surfaces.

TOTAL CONTROL

Shanks with 3 flat grooves (from \varnothing 3.5 mm) improve grip on the spindle, preventing slipping and ensuring optimum power transmission
