

BETA 416P/SP19

Set of 19 twist drills with cylindrical shanks, made from HSS, AISI M2, entirely ground,

Features

The BETA 416P/SP19 kit is the ideal set for the professional who seeks precision and speed for intensive use.

RAPIDITY

With the 416P drill, a drilling speed that exceeds that of standard drills by 30% is achieved, a result of the synergy between pilot drill and cutting edges.

PRECISION

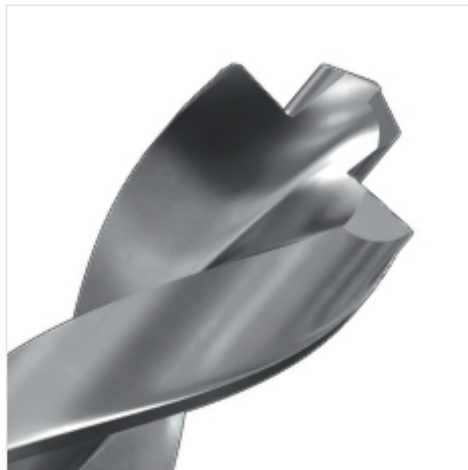

The reduced cutting edges simplify the start of drilling by generating a smaller initial hole, which is then expanded smoothly by the secondary cutting edges for a precise and clean result.

LONG LIFE

Superior HSS steel gives your tool high strength and performance, ensuring a long life even in the most demanding situations

PERFECT PRECISION

With three flat grooves, the shank fits easily and locks securely in the chuck, effectively preventing any slipping

PILOT DRILL BIT

The pilot drill, which facilitates the initial drilling phase, is equipped with a split point for easy centring when starting the hole.

MAXIMUM POWER

The three flat grooves on the shank ensure maximum power transmission due to the firm grip of the spindle.
