

8147P
Manual beam clamps for manual hoists

CE

Can be easily mounted on a structural beam, which creates a reliable anchor point for manual lifting equipment.

The central adjusting screw enables secure fixing according to the beam dimensions and can be locked by means of a dowel.

If the clamp is fixed correctly, it ensures high stability.

Technical data:

- Safety factor: 4
- Identification tag

Available certificates:

- Manufacturer's Certificate
- CE Declaration of Conformity
- Test report UNI EN10204 type 2.2
- Technical product specifications
