

8147S
Push trolleys for manual beam clamps

CE

EN 13157

Suitable for fixing and horizontal moving of hoists on structural beams, e.g. INP, IPB, IPE, HEA, HEB, by creating a secure anchor point. Loads are handled by pushing the trolley in the required direction. Trolleys are fitted with suspension lugs and shockproof wheel guards. Opening can be controlled manually, for quick positioning of trolley, adjusting it to beam profile.

Technical data:

- Safety factor: 4
- Identification tag

Available certificates:

- Manufacturer's Certificate
- CE Declaration of Conformity
- Test report UNI EN10204 type 2.2
- Technical product specifications
