Strumenti realizzati in lega beta-cobalto (beta-copper) e non devono essere usati in ambienti con presenza di vapori o polveri infiammabili o esplosivi.  
 I condotti per vapori non devono essere usati per fermare o contenere esplosioni.  
 Beta copper tools cannot be used in contact with vapours or with devices that produce or contain inflammable or explosive substances.  
 Aspiration can lead with the copper alloy tool surface vapor samples, vapour and any dangerous explosion.
