

BETA RSC50 2.0 KNAI-X

Lower corner module, for workshop equipment combination RSC50 2.0

Features

The ideal solution for those looking for quality and practicality in their work environment.

MAXIMISATION OF WORK SPACE

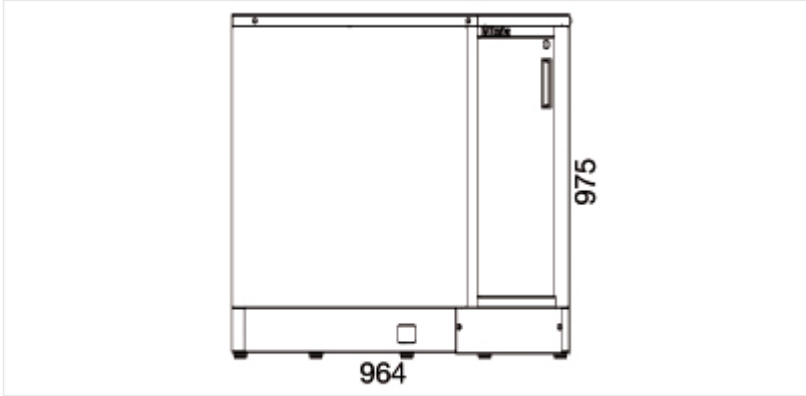

The 964x964 mm stainless steel-coated MDF corner worktop provides a large, hard-wearing and durable surface, ideal for carrying out various tasks in the workshop.

The angular shape makes the best use of space, optimising the work area without waste.

VERSATILITY

Thanks to the fixed module with large storage compartment, the necessary tools and materials can be efficiently organised, keeping the work area tidy.
